

# PEACE SAFETY EQUIPMENT AND PROCEDURE

I am aware that there are 50 adult and five child lifejackets on board and they are located underneath the benches in the galley plus under the sundeck pad.

I have been shown the proper way to don and use lifejackets.

I am aware there are 9 fire extinguishers on board, one in every major compartment, and four in the galley.

I am aware of the 5 smoke alarms throughout the bunk room and galley.

I am familiar with the location of the exit hatches.

I understand there is a general ALARM sound on board in case of emergency (demonstrated to me )

I understand the primary MUSTER STATION [ GATHERING PLACE IN CASE OF EMERGENCY] is on the rear deck of the boat.

The secondary MUSTER STATION is up by the bow of the boat. In case of emergency, the Captain or crew will direct me to the correct MUSTER STATION depending on the type of emergency.

I am aware there is a fifty-man inflatable life raft on top of the house of the boat.

I hereby certify I have read and understand this notice of the Fire and safety features on board the PEACE.

REGARDING LITHIUM BATTERIES, I UNDERSTAND I MUST FOLLOW THE STRICT RULES EXPLAINED TO ME AND POSTED IN THE CHARGING AREA.
